## Diploma In RISK AND LOSS MANAGEMENT

*A Joint Course :*

*AASTMT- Port Training Institute & L'Institut de formation port de Marseille Fos*

LET'S CHOOSE THE APPROPRIATE ACTIONS AND TAKE THE RIGHT DECISIONS

## Diploma In RISK AND LOSS MANAGEMENT

The sector of maritime transport and more generally multimodal international transport and import /export are activities which regularly generate damages / losses, implying various measures in terms of insurance and defense of the interests.

Professionals such as the experts, jurists, lawyers are "specialists" in terms of losses or damages, as well as their consequences

(Claim handling, negotiations, trials & disputes).

**Let's choose the appropriate actions and take the right decisions...**

The first measures taken are essential in order to protect the interests of each other. However, they are often made by operational staffs who are not necessarily specialists of these assets. And the consequences can be important for the company.

This program, based on the experience of maritime experts (Lawyer and surveyor), identifies the necessary methods and tools to manage efficiently a loss and / or a claim, in accordance with the legal regulation.

### Public - Objectives - Contacts

#### Public

Employees in import/export, transport, stevedoring, warehousing companies, or any firm being part of the international transport chain

#### Objectives

- Identify the different parties and interests
- Control the different stages of the management of a loss or a claim.
- Determine the right actions to be taken for the conservatory measures and the loss declaration / claim handling.
- Understand the relations between the various parties involved.
